

Australis

POOL COVERS

600 Micron Pool Cover

Using only the highest quality raw materials, our pool covers are formulated for year-round use in our harsh Australian conditions. Each pool cover is uniquely manufactured with horizontal panels, allowing for a customised pool cover for all shapes and sized pools.

The horizontal panels allow the pool cover to wind up onto the pool cover roller significantly better than their vertically welded mass produced counterparts, as the weld lines run parallel and conform to the roller tube, as well as create a great visual aid during the rolling up process.

All Australis Pool Covers are Australian Made and extruded plastic, and the pool covers are manufactured on the Central Coast, NSW.

Highlights

- 12 year warranty
- Smart Watermark approved
- Climate Care Certified
- Suncap 600
- Australian Owned & Made
- Custom made
