POOL COVERS

Fully Mobile Pool Roller

A Pool Cover Roller is not essential, however, using your Pool Cover is significantly easier with the aid of a pool cover roller. We find that any pool over approximately 6m x 3m will probably benefit from the purchase of a pool cover roller. It takes just 30 seconds to roll the pool cover off or back onto the pool water.

With Pool covers that are larger than 40 square meters (9m x 4.5m), it's a good idea to consider purchasing a fully mobile roller which has four lockable wheels. A pool roller without the cover weighs approximately 15kgs, when you add the weight of a large pool cover a roll away option is well worth the additional cost. The locks are easily clicked on and off with your foot and the wheels roll in any direction.

Specifications

- 10 year warranty
- U Shaped power-coated aluminium frame with 4 lockable casters
 - End slug insert
- 100mm diameter x 1.9mm wall thickness anodised aluminium tube
 - Attachment kit - including ropes, eyelets and eyelet knife
 - Canvacon Sun Cover included
 - Custom made
- Available in black or white
