POOL COVERS

Leaf and Debris Pool Cover

The leaf and debris pool cover is made from fine mesh woven polypropylene or polyethylene fabric. The mesh allows rain water to pass through the cover while leaving the leaves, debris, bugs etc. on the outside. Leaves can be easily blown off by any wind – or by a little manual assistance from a broom or leaf-blower.

Leaf and debris pool covers are lightweight, they don't require a roller, and can usually be fitted by one person. That said, they do take considerably longer to fit than a solar pool cover or thermal blanket – either of which takes less than a minute with a roller.

Leaf and debris pool covers are available and suitable for both in-ground pools and above ground pools.

Highlights & Facts

- 5 year warranty
- Non woven polypropylene material
- Roped hem edge
- Removeable cleats
- Available in blue/green/grey or tan
- Deters ducks
- NOT a safety cover
- Does not stop rain from getting in
- Avoids small particals entering the pool
