POOL COVERS

Under Bench Pool Roller

Pool Cover Rollers are not essential, however, using your Pool Cover is significantly easier with the aid of a pool cover roller. We find that any pool over approximately 6m x 3m will probably benefit from the purchase of a pool cover roller. It takes just 30 seconds to roll the pool cover off or back onto the pool water.

An under bench roller is a dual use product combining the handling of the pool cover together with a decorative pool side seat. This roller can be purchased in both manual operation or as a powered operation using a battery pack which powers a concealed electric motor. This item also comes with a small solar panel to assist with battery recharging and two hand held remote controls allowing operation of the roller at a short distance. The seat comes in four decorative colours and is available for pools up to 6m wide.

Specifications

- Full aluminium frame and seating with stainless steel hardware
- Seating planks with a choice of
 - Anodised Aluminium
 - Charcoal Shimmer
 - Wood look Light Oak
 - Western Red Cedar
- Pool cover attachment kit
- 10 year pro rata warranty.

The Under Bench Roller combines practicality with style, transforming your pool roller into a useful seating option.

Simple yet stylish, the Under Bench Roller is not just a roller but a useful poolside addition to compliment contemporary pool settings.
